1. Project progress

CISESK continues to work in the framework of the Volunteering sector. At the moment we are testing a new software for assessing and certifying non formal and informal learning deriving from Voluntary Civil Service experiences.

The software will be ready at the beginning of June, and will enable to all the volunteers to certificate their own informal learning:

SOFTWARE AIMS

- **Identification of competences** acquired via non formal and informal learning during civil service experiences (two steps)
- **Release of a Declaration of competences**: “online tool automatically monitoring and certifying competences”

2. Research

The final version of the Research is already online. The research is available in 5 languages (EN,ES,IT,DE,BG) in our website: www.ciseskproject.eu

The conclusions that can be drawn from the questionnaire and the research work concerning the assessment instrument can be summarised as follows:

- Assessment tools should generally be regarded and designed as complementary to interviews and can replace written tests / assessments.
- Online self assessment can be seen as the appropriate tool, the time necessary for completion should not be too much (not more than 60 minutes).

CISESK Certification of Civil Services non formal and informal Skills

- The main focus of the assessment should be the gain of competencies during the voluntary service, so as to document a training success (by NF/I learning methods) gained by the voluntary service.
- Regarding the volume of EVS compared to overall voluntary work, it seems useful to have an open profile that is fitting for general voluntary work/service, not only for EVS.

The assessment instrument implemented within CISESK (based on the product of CSA) will therefore fulfil the following features:

- It will be available and submitable online.
- It will allow for self assessment of volunteers in a two step assessment:
 - One assessment right after the begin of the voluntary service
 - One towards the end of the voluntary service
- It will focus on the key competencies gained / improved during the voluntary service.
- It will be available in all project languages (English, Bulgarian, German, Italian, Spanish)
- The result will be a kind of certificate on the improvement of the key competencies.
